

# CATARACT QUESTIONNAIRE

## THERE HAS NEVER BEEN A BETTER TIME TO HAVE CATARACTS!

We've got great news! With advancements in technology, there are now several options available that allow you to renew your vision and regain control of your lifestyle. Medicare and other insurance companies now allow you the freedom to choose one or both of the following:

### 1 High Definition Laser Cataract Surgery™

Blade-free, all-laser cataract surgery gives you more precision, accuracy, and safety than classic cataract surgery. Most patients will achieve great distance vision without glasses.

### 2 LIFESTYLE IMPLANT

Whether in concert with High Definition Laser Cataract Surgery™ or classic cataract surgery, Lifestyle Implants provide good distance, intermediate and near vision without glasses.

This survey is designed to help you decide what is best for you – because you only get one chance at cataract surgery. Please fill out this survey and bring it with you to your appointment. Our staff will discuss your options in detail and answer any questions you may have.

What is your occupation?

---

---

What are your favorite hobbies/recreational activities?

---

Have you had previous eye surgery?  Yes  No  
If yes, what type of surgery?

---
